

This summary gives you the important information you need to know about your SmartPABX service plan. It covers things like the length of your contract, how much you need to pay each month, what's included and what's not.

Information about the Service

SERVICE DESCRIPTION

SmartPABX is a cloud hosted voice telephony software solution delivered over your internet service. The internet service may be supplied by Broadband Solutions or by another service provider.

AVAILABILITY

SmartPABX is available anywhere in Australia that has an internet connection.

MINIMUM SERVICE TERM

The service is supplied on a 36 month contract term (other contract term options may be available upon request)

REQUIREMENTS

SmartPABX uses SIP for voice calling. Broadband Solutions recommends a minimum of 128Kbps of internet bandwidth availability per active call. For example: For a SmartPABX 10 Extension service, it is recommended to have 1280Kbps of bandwidth available on your internet connection so that all 10 extensions can be on the phone at the same time..

IMPORTANT CONDITIONS

The quality of your internet service directly relates to the quality of your voice calls over SIP. Broadband Solutions recommends a quality assured business grade connection (such as Broadband Solutions Elite Fibre) to ensure the highest quality of voice calls remains consistent.

Information about Pricing

Pricing for SmartPABX varies depending on the plan you choose and your contract term. A Broadband Solutions representative will be able to identify options and pricing for you.
